

Native output distributions (panels are not calibrated to one another)

--- 0.5 display threshold

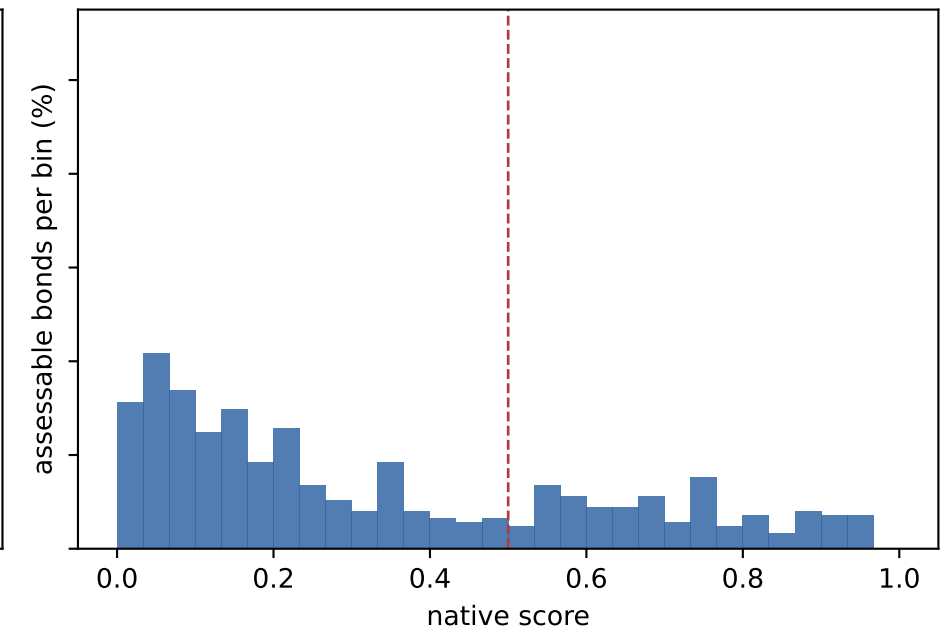

pepsickle-in-vivo-all-mammal
n=858 assessable bonds

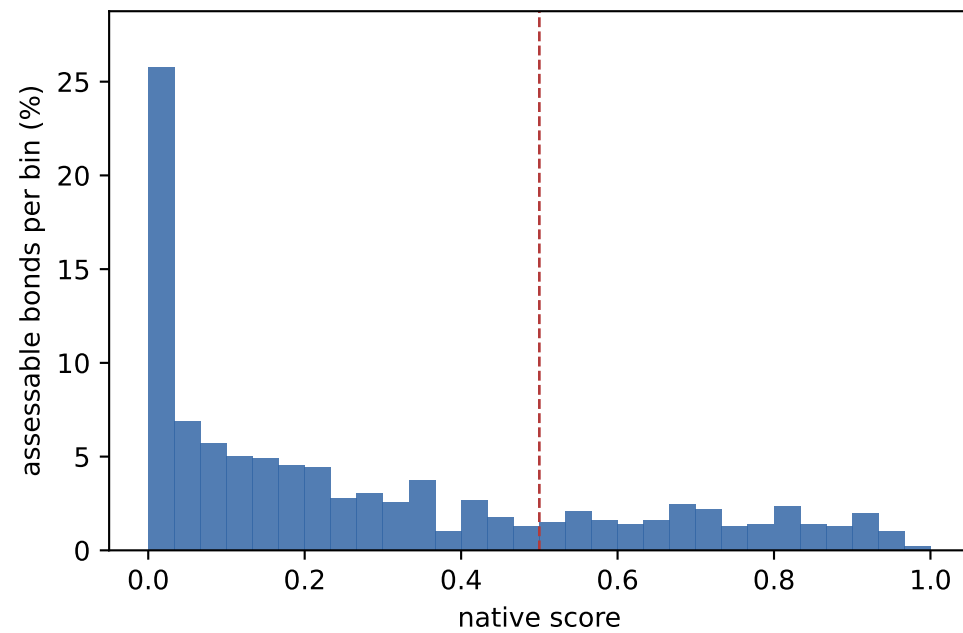

netchop-3.1-cterm-3.0
n=858 assessable bonds

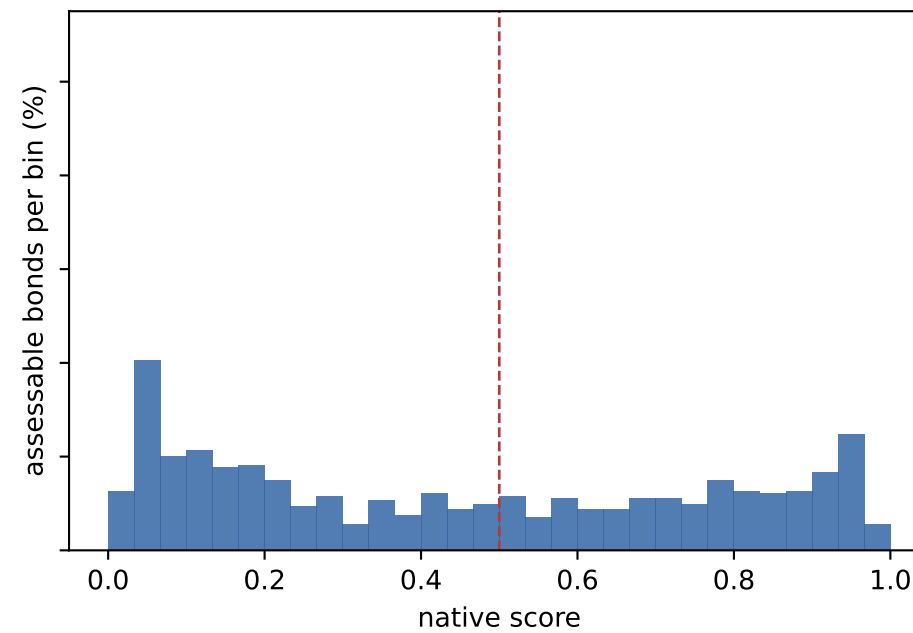

netcleave-i-hla
n=498 assessable bonds

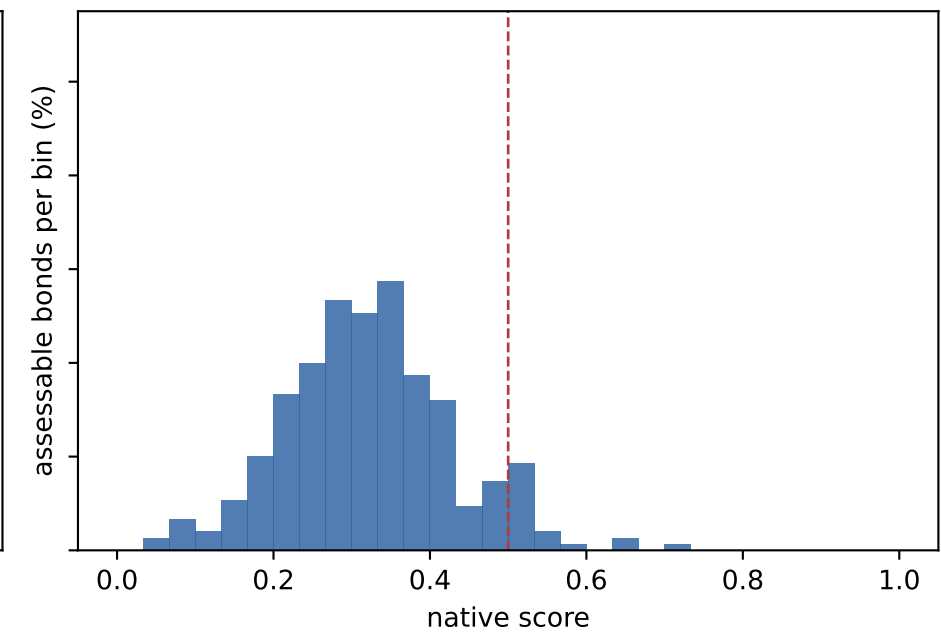

pepsickle-in-vivo-human-only
n=858 assessable bonds

netchop-3.1-20s-3.0
n=858 assessable bonds

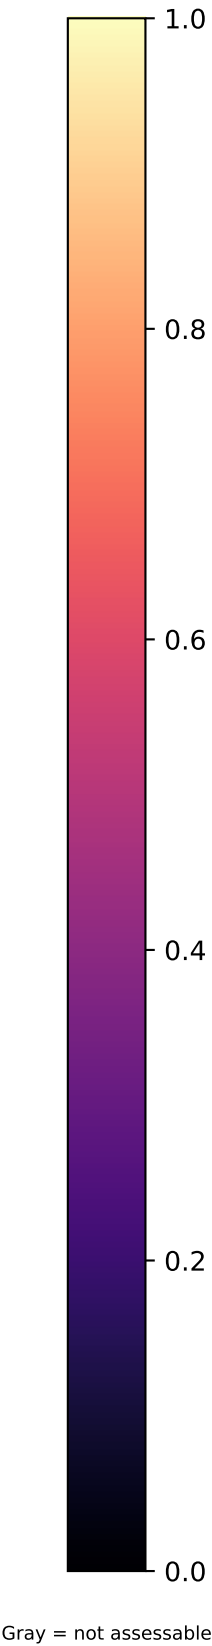

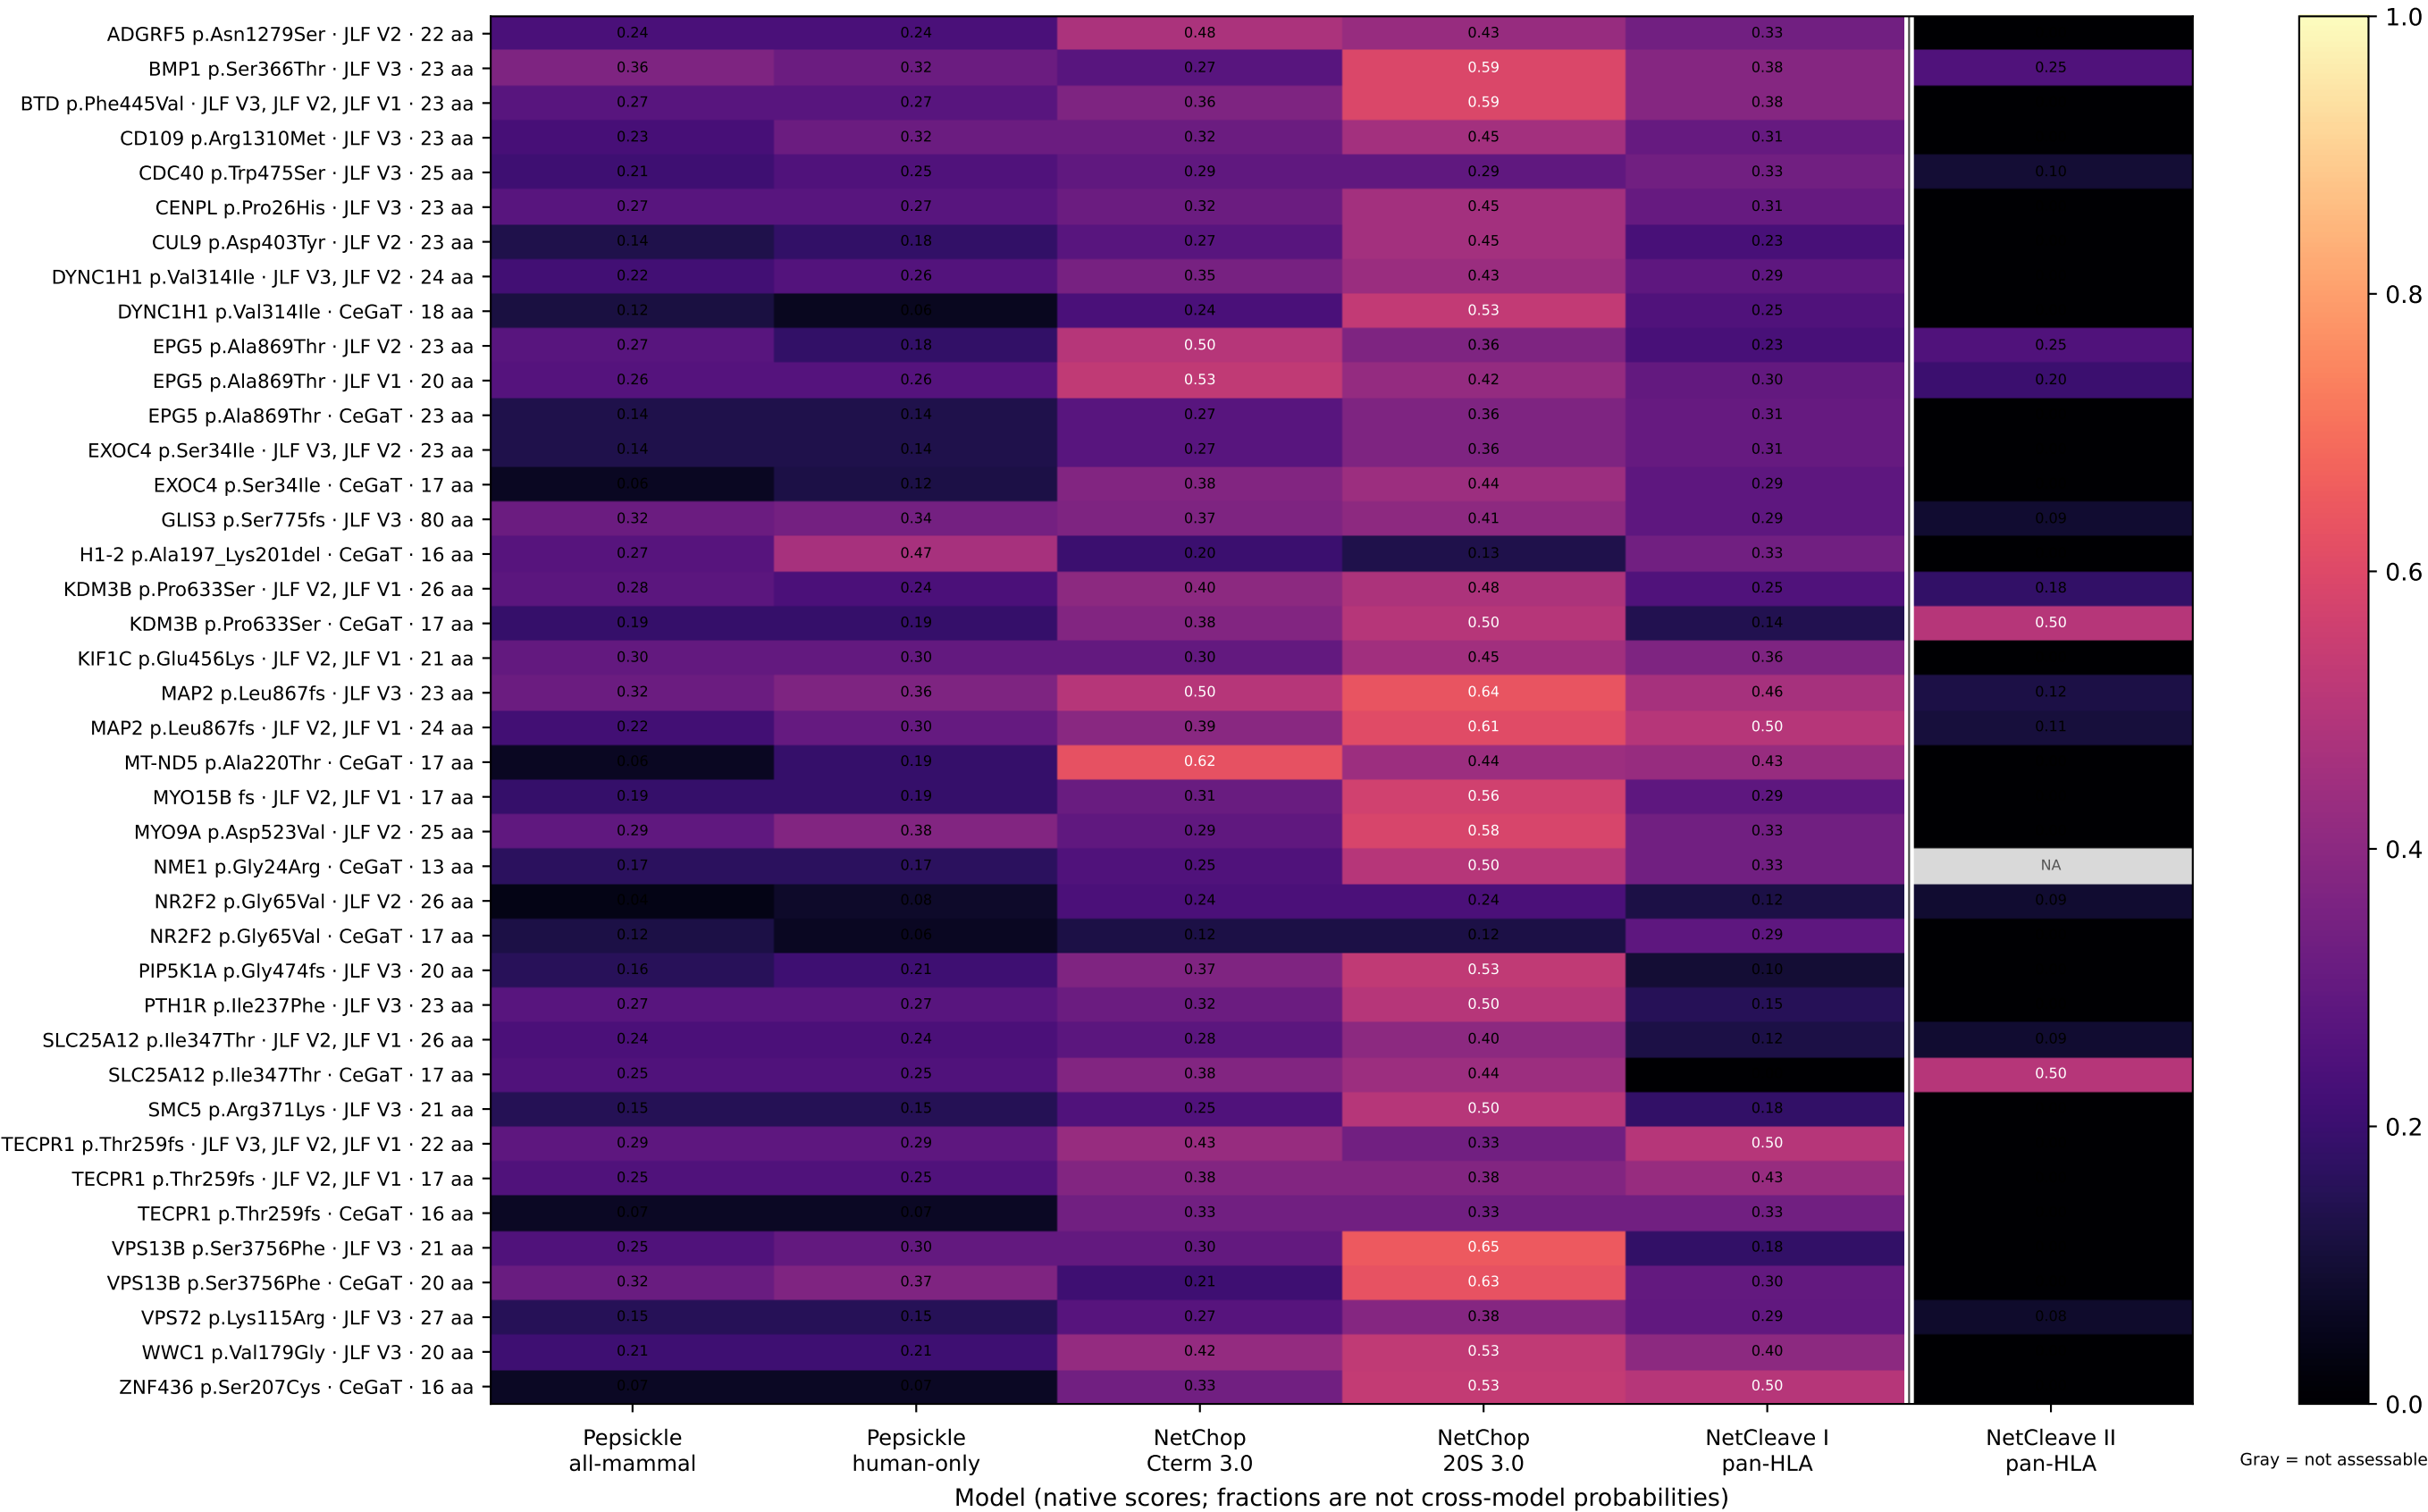

netcleave-ii-hla
n=300 assessable bonds

Fraction of assessable internal bonds at or above 0.5
Proteasome / MHC-I processing models

MHC-II processing model

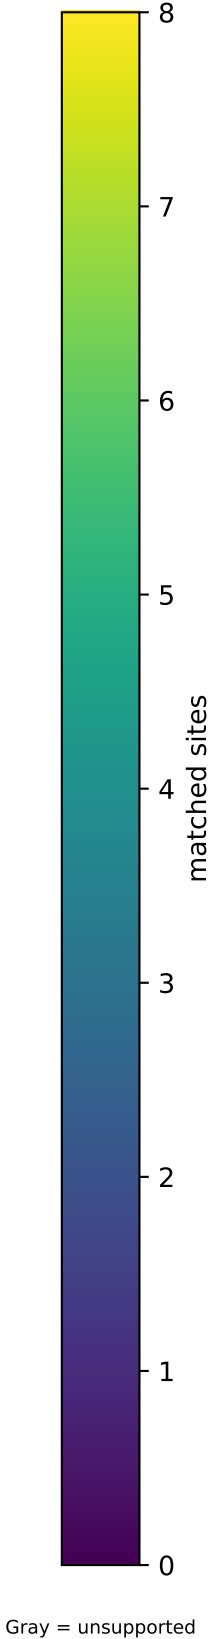

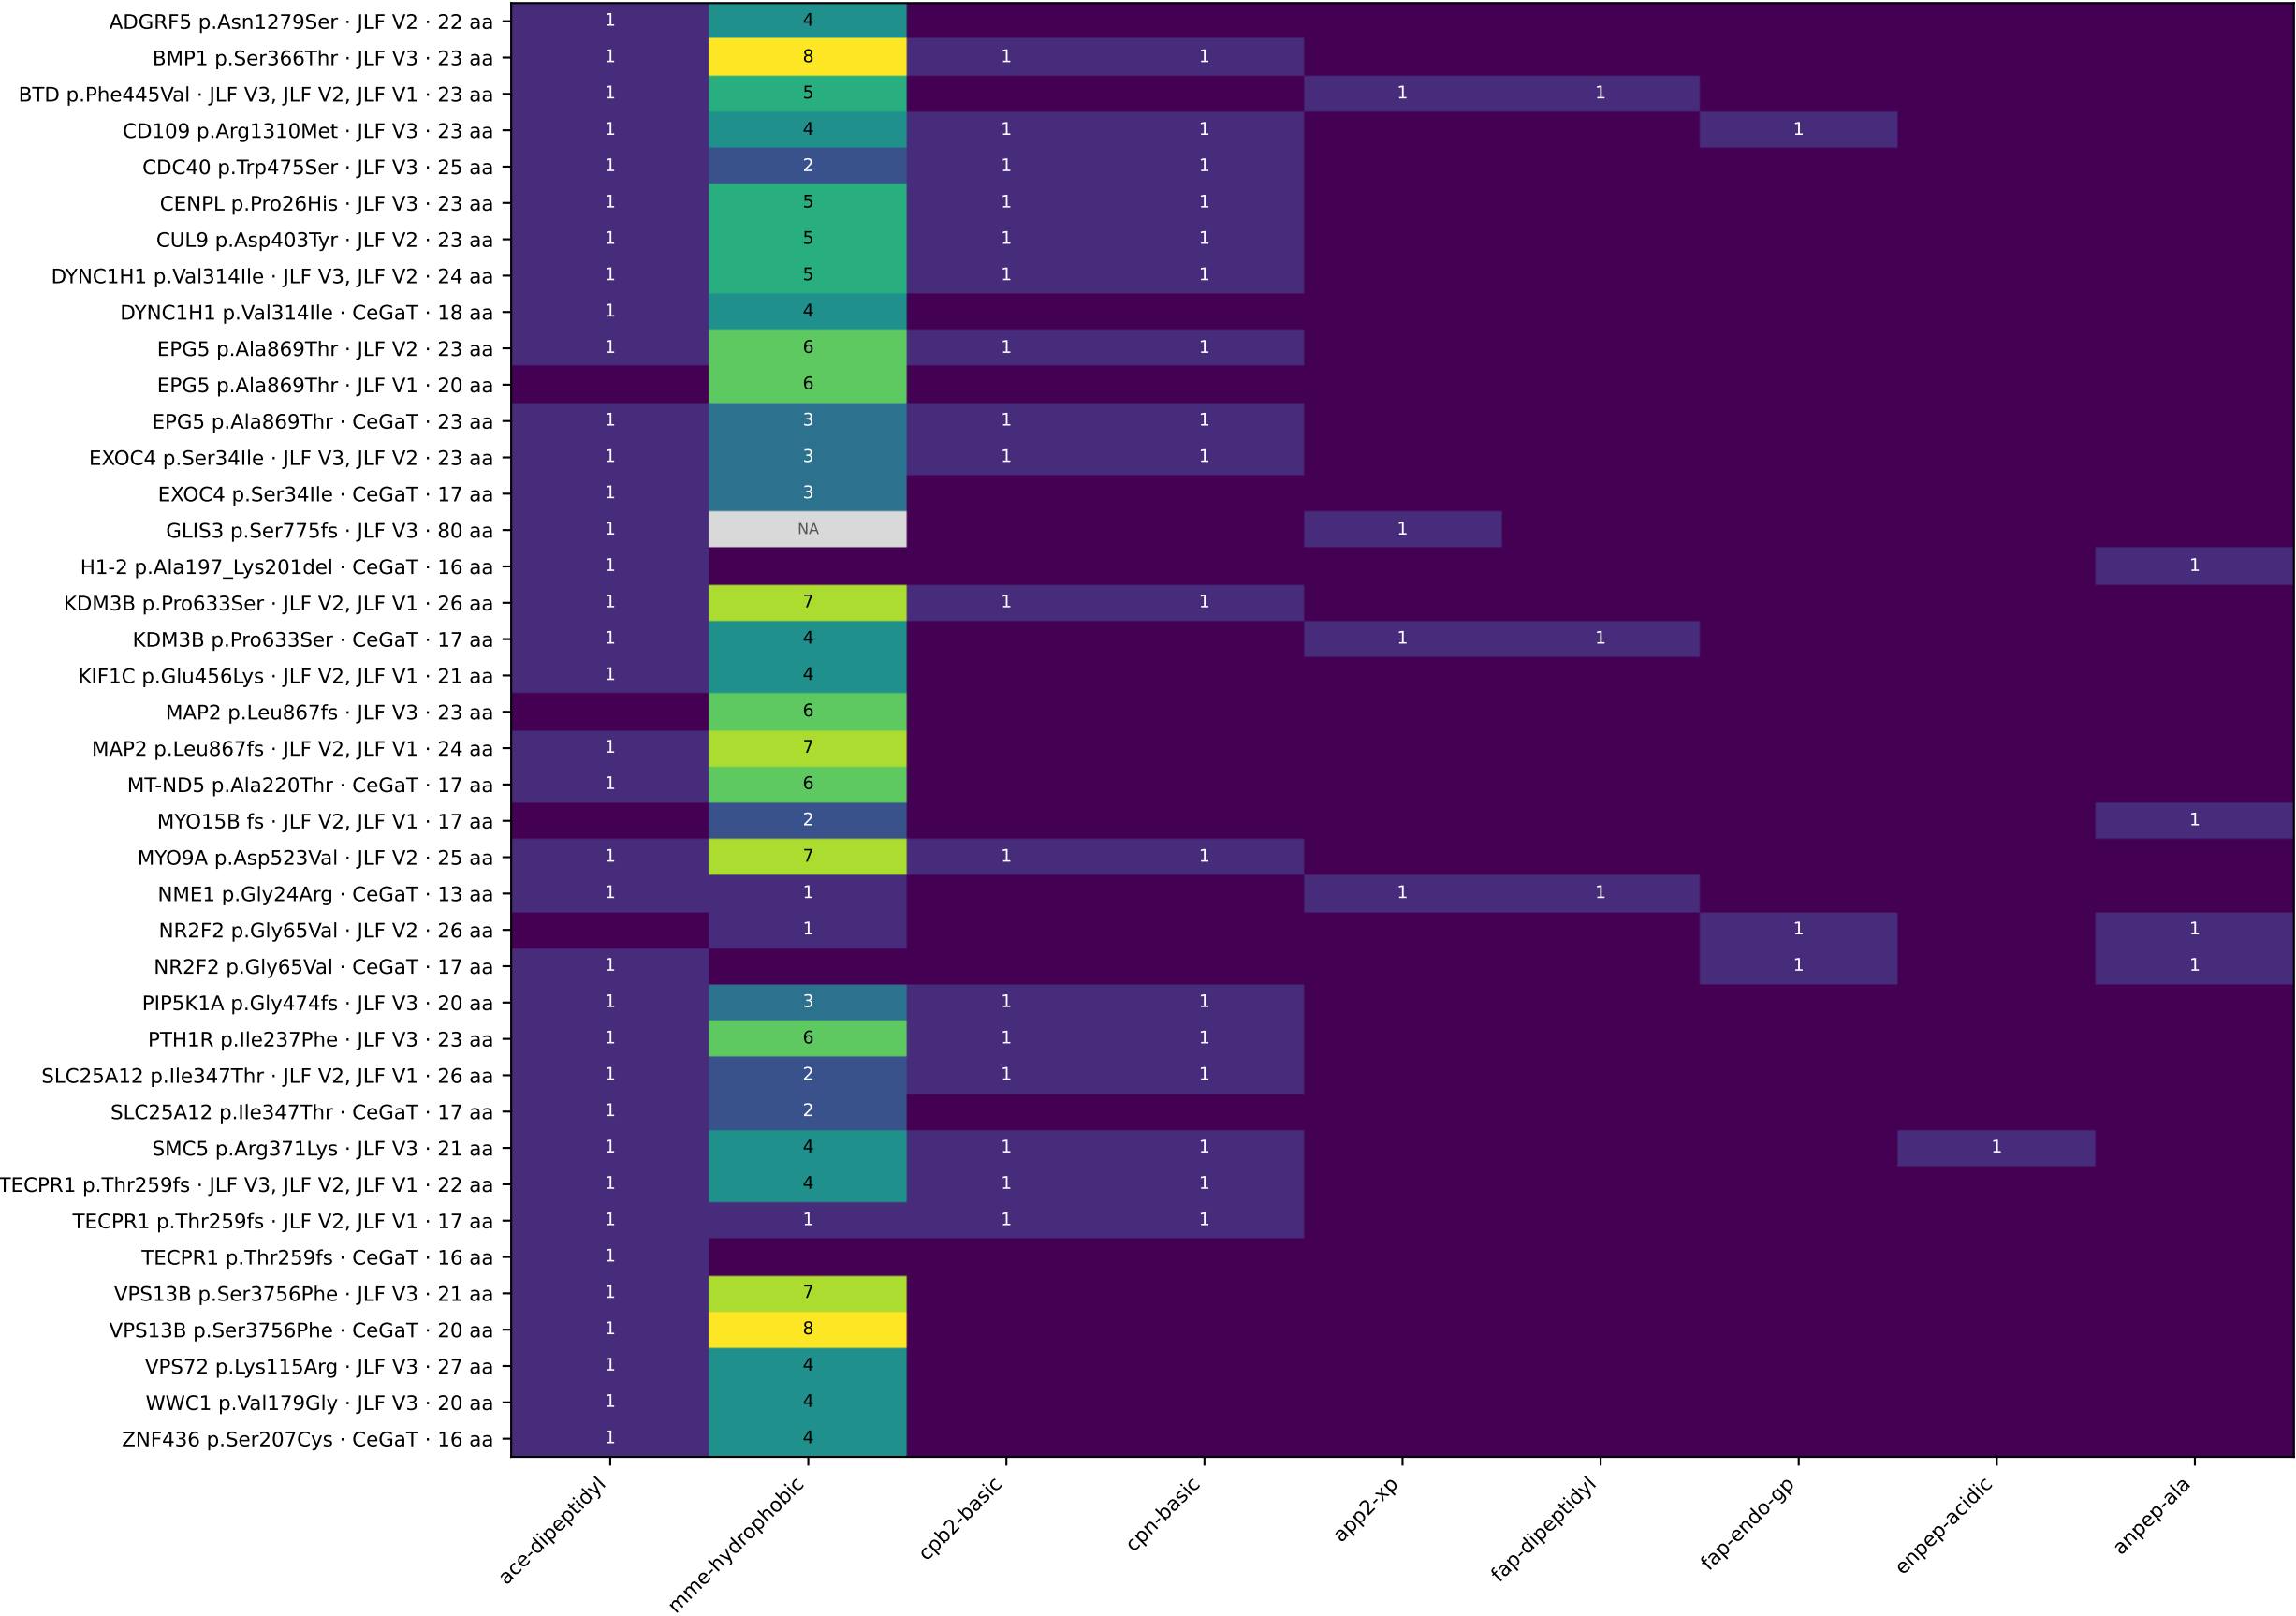

Disclosed synthetic long-peptide record

Extracellular and plasma peptidase motif matches

Compartment grouping is for readability; see model_catalog.csv for full context.

Disclosed synthetic long-peptide record

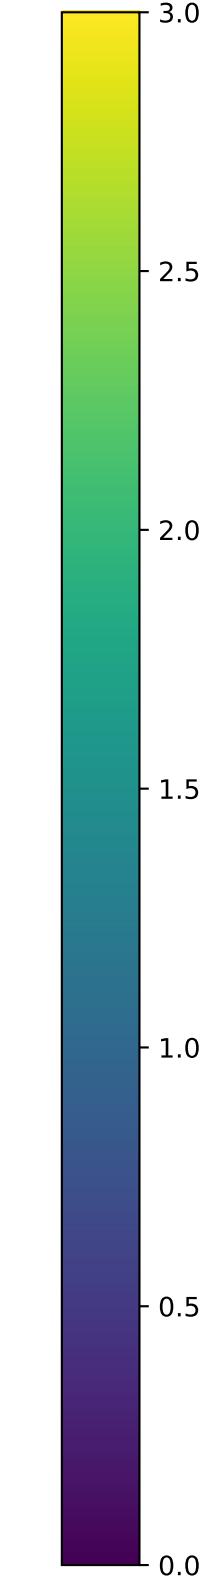

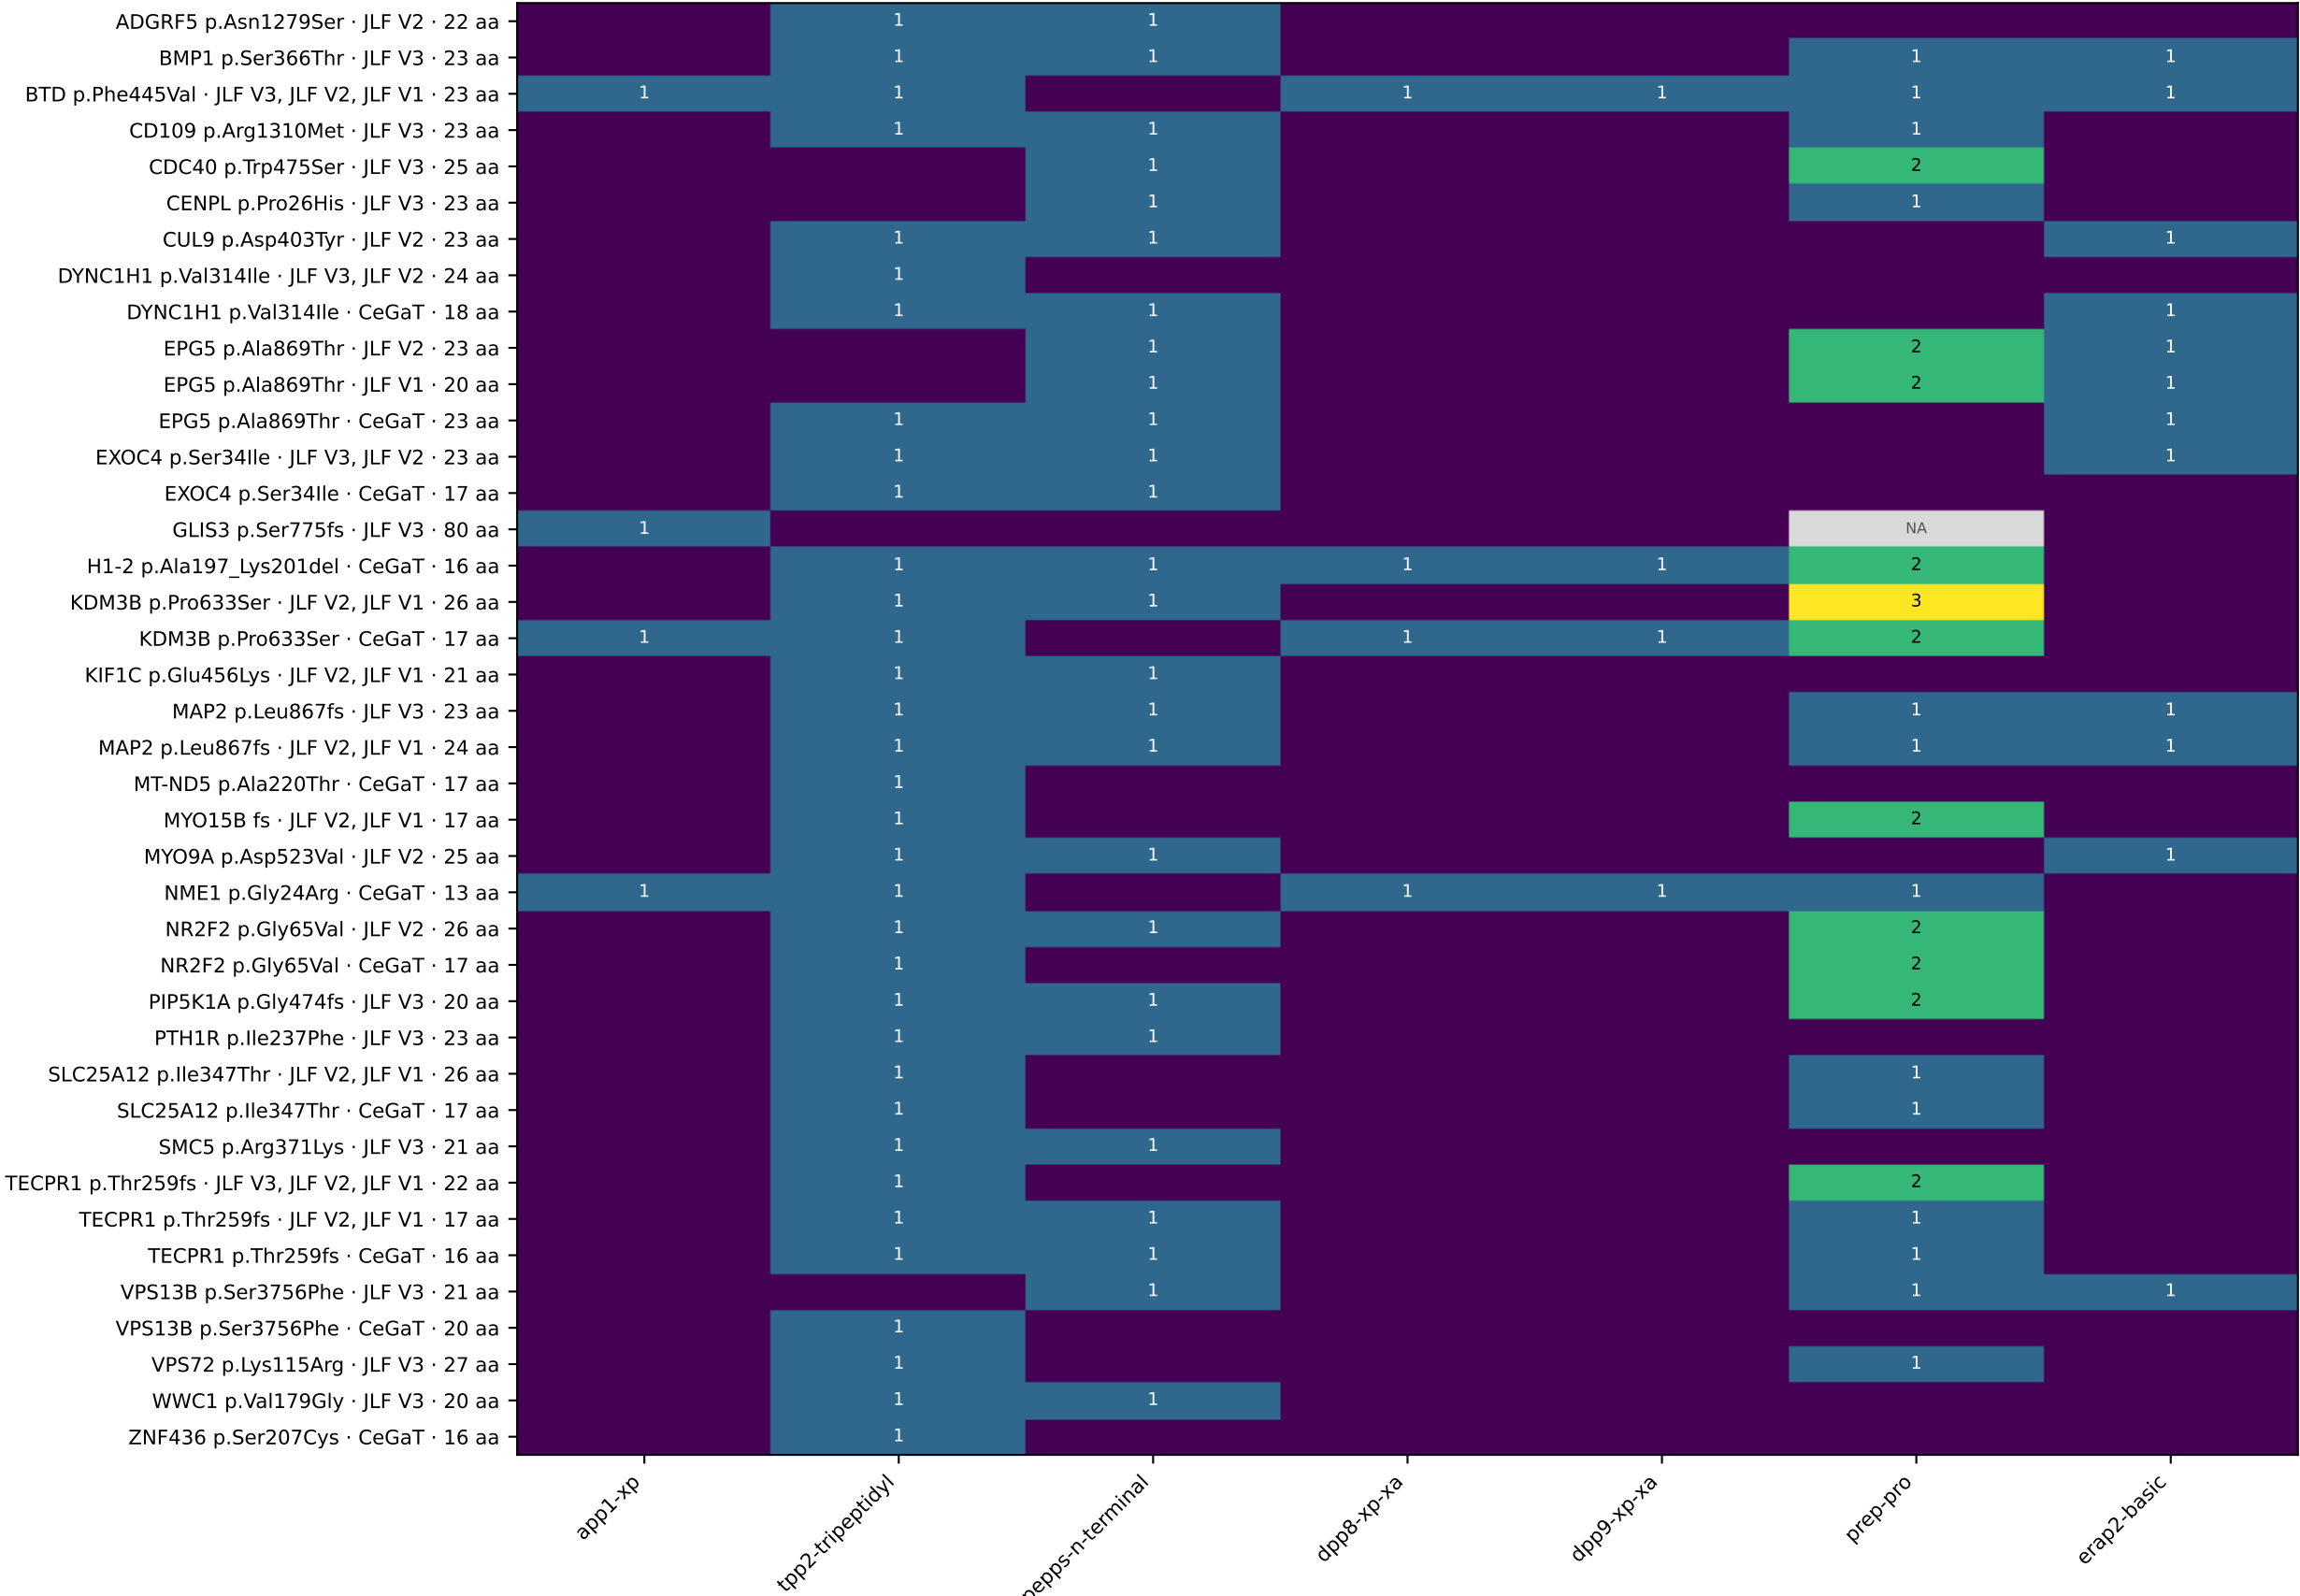

Curated recognition rule (a match is not a cleavage probability)

Intracellular and ER peptidase motif matches

Compartment grouping is for readability; see model_catalog.csv for full context.

Disclosed synthetic long-peptide record

Gray = unsupported

Curated recognition rule (a match is not a cleavage probability)
